## 1.各表情头像prompt

Character emotions sheet, multiple expressions of the provided character, featuring happy, sad, angry, surprised, shy, confused, playful, disgusted, thoughtful, crying, and embarrassed. Full set of emotions, clear and distinct expressions, clean background

A cinematic scene inside a fast food restaurant at night.

Foreground: a lonely table with {food\_items}, and a smartphone shown large and sharp on the table, clearly displaying the uploaded anime/game character image.

A hand is reaching for food, symbolizing solitude.

Midground: in the blurred background, a couple is sitting together.

One of them is represented as a cosplayer version of the uploaded character:

-If the uploaded character is humanoid, show accurate cosplay with hairstyle, costume, and signature props.

If the uploaded character is non-humanoid (mecha, creature, mascot, etc.), show a gijinka (humanized cosplay interpretation) that carries clear visual cues, costume colors, and props from the reference image (armor pieces, wings, ears, weapon, or iconic accessories).

The other person is an ordinary human, and they are showing intimate affection (kissing, holding hands, or sharing food).

Background: large glass windows, blurred neon city lights outside.

Mood: melancholic, bittersweet, ironic, cinematic shallow depth of field.

[reference: the uploaded image defines both the smartphone display and the cosplay design, with visible props emphasized]

## 2.专属手办prompt

Create a photorealistic, highly detailed PVC character figure, meticulously crafted based on a photograph. The figure stands proudly on a sleek, round plastic base. Behind it, its collectible box features a high-quality print of the original character art. Adjacent to the box, a computer monitor displays the intricate 3D modeling process in Blender, showcasing the digital sculpting and texturing. The entire figure is rendered in a clear, translucent PVC material, giving it an ethereal, ghost-like quality. The scene is set within a professional design studio with soft, diffused indoor lighting that highlights the figure's form and transparency.

### 3.模特卖家秀prompt

Take the model from [Model image] and dress her in the complete outfit shown in [Clothing item image #1]. Place her in a bright, outdoor park setting during a sunny day. Ensure the clothes fit her body realistically, with natural folds and shadows. The model's face, hair, and identity must remain consistent.

### 4.AR眼镜prompt

Analyze the provided [Scene Image]. Identify the 1-3 most prominent landmarks, buildings, or points of interest. For each identified point, draw a neat, glowing blue outline around its silhouette. Next to each outline, overlay a clean, semi-transparent dark UI box. Inside each box, display plausible information such as a generated Name, Type/Location, and a brief, one-sentence description. The overall style should be modern and informative, like an augmented reality (AR) view.

### 5.3D版本Logo prompt

Using the xxx from [Logo Image] as the core subject, redesign it in 5 different styles: 1. Cyberpunk, with neon glows and metallic textures. 2. Steampunk, with gears, brass, and clockwork elements. 3. Minimalist line art. 4. 3D inflatable plastic toy. 5. Traditional Japanese ink wash painting (Sumi-e). Maintain the basic shape and recognizability of the owl.

### 6.人脸 prompt

Take the person in [Photo of a person]. Please make two subtle changes. First, change her hair color to a light pink. Second, add a pair of modern, black-rimmed glasses to her face. Ensure the changes look natural, with correct lighting, shadows, and reflections. Do not alter her facial features or expression.

### 7.变3D立牌

turn this photo into a character figure. Behind it, place a box with the character's image printed on it, and a computer showing the Blender modeling process on its screen. In front of the box, add a round plastic base with the character figure standing on it. Make the PVC material look clear, and set the scene indoors if possible.
